

Save time with BASpay History Archive, the flexible, easy-to-use program that helps you manage the size of your Abra Suite® databases. This program will archive and unarchive history records (typically, from past years) for faster processing, reporting, and back-up's.

Speed Up Payroll Processes

- **Speed up processing!** Store historic records from payroll, HR, Attendance, Train in an archive directory to reduce file size. Processing speed varies depending on the number of history records.
- **Prepare and Run Reports Faster!** Reporting is particularly prone to slow processing when large databases are involved. You'll notice an immediate improvement in the speed of report preparation when using BASpay History Data Archive. Changes can be dramatic!

Maintain Online Access to Archived History Records for Analysis And Reporting

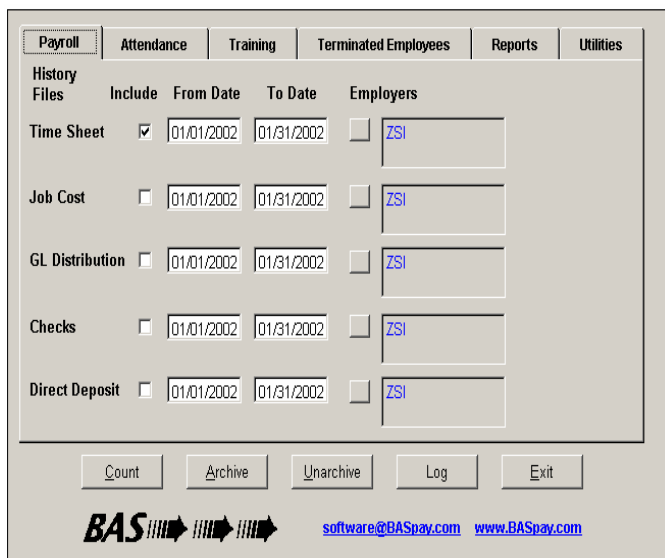

- **With Archive, you get to keep your history!** Unlike other programs, you can move archived files back into your active databases if you need to use those records for reporting and querying.

Control the Archive Process

- **Payroll files can get large!** You control which payroll records to archive, including time sheet history, general ledger history, job cost history, check history and direct deposit history, or any combination of these. Control archiving by company and date range.

Options Give You Flexibility

- **Archiving Old Terminates Records cleans up HR.** You can maintain the size of the personnel file and job history by archiving records and history of terminated employees with the Terminated Employee Archive option. Selected employees can be un-archived for the rehire process, as needed.
- **Attendance and Train Options handle archiving other ever-growing files created by busy organizations.** Archive Attendance transactions, Employee Training, Employee Classes, and/or Class Information, as needed.
